Classification according to Regulation 1272/2008/EC:

Aquatic Acute 1; H400

Aquatic Chronic 1; H410

Hazards to man: Does not meet the criteria of classification.

Hazards to environment: Very toxic to aquatic life. Very toxic to aquatic life with long lasting effects.

Hazard from physical and chemical properties: Does not meet the criteria of classification.

In section 16 stated the importance of H-phrases and symbols.

During the classification of the substance (nanomaterial), a classification according to the CLP Regulation was used, but the actual environmental hazards are negligible due to the construction of the compound. This is indicated by literature data on similar nanomaterials (containing zinc oxide in their structure) and tests carried out by Nanoxo sp. z o.o. However, to maintain compliance with the CLP Regulation, the classification for environmental hazards has been maintained. Changing the classification in the safety data sheet in accordance with regulations requires further detailed testing.
